

PRIME STEM Scholar Testimonials

Sara Bolivar
Molecular Biology

“Since I got accepted into the PRIME STEM project, I have felt very welcomed. Every time I have needed help or guidance I have always been given it without hesitation. The workshops they provide help us be more well-rounded students in various relevant subjects in our lives. The tutoring and learning services are amazingly helpful as well. Overall, this is a great program to be involved in.”

Talia Chavez
Health Sciences

Being a PRIME STEM scholar has allowed me to know and network with professors within my field via programs such as Lunch and Learn. I have also recently been paired up with an unbelievable mentor. Just talking to her and hearing about her achievements is inspiring! I look forward to making my friends and advisors within the program proud, when I walk across the stage, diploma in hand, a PRIME STEM graduate.

Nathanaelle Joacin
Biology

“My experience with PRIME STEM has been more than rewarding. I truly have used this small-scale community as a vessel for academic and personal growth. There is nothing I asked that I did not get. I had recommendation letters that helped me get accepted into prestigious programs like summer research academy and opened the doors to various opportunities. Also I was exposed to lots of opportunities on a daily basis and the peer mentors are great! I was paired with someone in my same track that helped with the ins and outs of college life. PRIME STEM has been a great help!”

Ramon Santana
Mechanical Engineering

“Participating in PRIME STEM was one of the best decisions I’ve made. I would not be where I am today without all the help and support I got from the program. It has given me the confidence to know I have what it takes to succeed and the motivation to finish my engineering degree.”

Lee Sully
Computer Science

“My experience with the program/staff members has been welcoming and warm. I felt like I had a group of people that genuinely cared for me and my education, and this is what I have been looking for, for a while now ever since I have transferred to the university all by myself. It helps remind me that I am not alone. I am grateful for all the help I have received.”
